

Overland's Software and Hardware Compatibility Guide

Updated 11/5/01

Revision 4

The following compatibility guide is provided for your reference. Since testing is always in progress, please contact us if a product is not on the list. Also, many hardware and software vendors conduct their own testing; check their compatibility guides for any configuration settings or limitations.

Overland's autoloaders and tape libraries can be used in SAN configurations in conjunction with Overland's SANPiper (fibre-to-SCSI bridge). In the Neo series, it is recommended that the internal Fibre Channel Option card be used rather than the SANPiper for higher throughput. The fibre channel interface includes Extended Copy support, which is required for LAN-Free (Server-Free) backup.

Please check the "**Fibre Channel Card**" section of this guide for compatible hardware devices.

Go to the SANPiper section for devices that are compatible with it.

Call Overland Data for more information or questions at 1-800-729-8725 or email sales@overlanddata.com

What's New?

Vendor	Product / Operating System	Overland Product
Computer Associates	ARCserve for Linux, Linux	All Autoloaders
Legato	NetWorker; Linux RedHat 7.1	Library Pro (AIT2)
Veritas	NetBackup, BusinessServer, and DataCenter; Updated All DLT, SDLT Support	All

The Neo Series Fibre Channel Option (FCO) Hardware Compatibility List

Updated 10/30/01

The Neo series architecture includes a Compact PCI slot for an internal Fibre Channel Option card. The fibre channel interface includes Extended Copy support, which is the technology required for LAN-Free (Server-Free) backup.

The following software products have certified the Fibre Channel Option Card with the Overland Neo series library for Fibre Channel connectivity. Other bridges may be compatible, please check with the software vendor.

Software Vendor	Product	Status
Legato	NetWorker 6.0	Certified
CommVault	Galaxy, Version 3.1.1 above	Certified
Syncsort	Backup Express, Version 2.1.4	Certified
BakBone	NetVault, 6.5	Certified
Tivoli	Tivoli Storage Manager	Q1 2002
Computer Associates	ARCserve and Enterprise Backup	Q4 2001
Veritas	Backup Exec	Q1 2002
Veritas	NetBackup	Q1 2002

The following devices are compatible with the FCO card on both NT and Solaris operating systems.

Devices Compatible with Neo's Fibre Channel Option Card

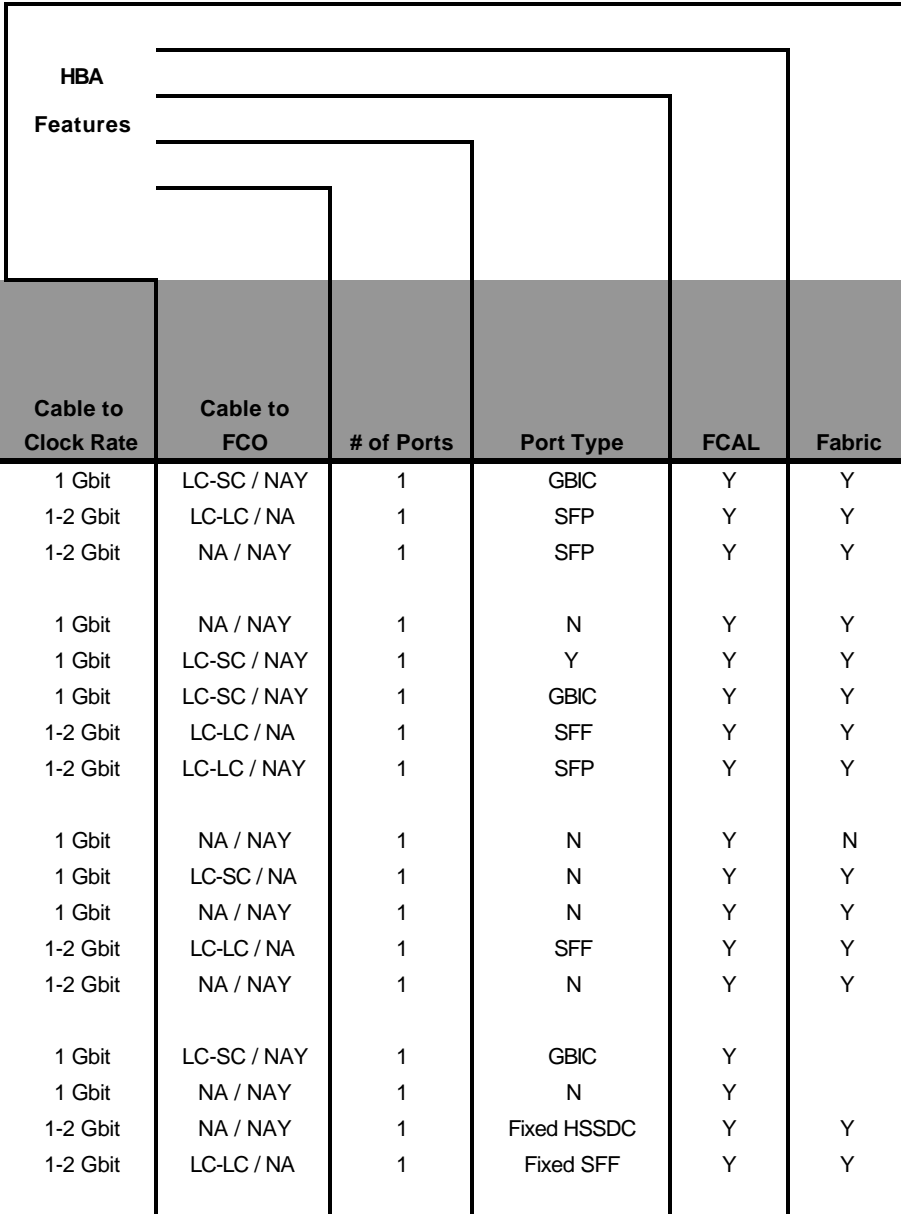

Device: Host Bus Adapter

Tested= Tested by Overland or Vendor, and compatible

Compatible= Same as tested device

Planned= Scheduled for testing

SANPiper Hardware Compatibility List

Updated 6/30/00

Overland's autoloaders and tape libraries can be used in SAN configurations in conjunction with Overland's SANPiper (fibre-to-SCSI bridge). The fibre channel interface includes Extended Copy support, which is the technology required for LAN-Free (Server-Free) backup

SANPIPER HARDWARE COMPATIBILITY LIST

6/00
